New and original

This new Forbo Marmoleum range is a collection with a twist. We offer you 61 colours and designs with which you can create inspiring and fitting floor solutions for your environment. There are six tile sizes ranging from the larger 75 x 50 cm and 50 x 25 cm rectangular tiles, to the 50 x 50 cm and 25 x 25 cm squares and the 100 x 25 cm and 100 x 15 cm planks.

Linoleum

This collection takes linoleum out of its traditional environment. Marmoleum Modular offers a playful experiment with colour and design, like no other floor covering has done before. Subtle nuances or strong contrasts, the choice is yours. You can create industrial looking concrete or marbled floor designs, you can be subtle by playing with tone in tone colour differences that create floors resembling natural stones or concrete. You can play around with the direction of the lines to create a wood like floor. Or you can be bold and colourful by using the expression of colour to create your own design highlights in your environment.

The PVC-free alternative

The Marmoleum Modular collection offers a high quality non PVC alternative to all Luxury Vinyl Design planks and tiles that are available in the market today. Made of renewable natural materials, Marmoleum is PVC-free and does not contain any phthalates or other plasticizers. Marmoleum is certified by internationally recognized environmental labels such as (a.o.) the Blue Angel, The Nordic Swan and Nature Plus. In addition, using Marmoleum in your projects will award you with credits towards the international LEED certification for sustainable buildings.

Creative freedom

Marmoleum Modular offers you the possibility to create the floor of your choice. The collection invites you to play, combine and connect, shape, size and colour of the tiles you decide to use. In this way a complete new floor concept is created, one that goes beyond the traditional floor offer where just the design alone leads your choice. Now you can play with the shapes, sizes and tile formats you choose to create the floor you want to have.

PLAY

WITH **marmoleum® modular**

THE MODULAR CHOICE COMES NATURAL

Many flooring alternatives already present themselves in a modular format: wood, stone, ceramic, or carpet tiles, all offer various ways to creating floors with an identity of their own. In linoleum it comes in a natural way.

LINES

SHADE

COLOUR

MARBLE

THIS NEW LINOLEUM COLLECTION FROM FORBO PRESENTS ITSELF IN FOUR INDIVIDUAL EXPRESSIONS:

Lines: a contemporary collection of abstract linear designs. The random calandered pattern of the striato planks create a unique natural design that reflects both modern and traditional wood and parquet floors. The floor design options vary from uni coloured linear installations, to elegant herringbone motives. By mixing various colours into one design, subtle nuances can be created as the colour scheme of Striato provides for tone in tone creations.

Shade: a collection of a subtle concrete look in cool and warm grey tones as well as black and white. The colour range consists of delicate steps in colour intensity and hue to create natural realistic stone and concrete patterns. The XL tile (75 x 50 cm) allows you to emphasize the material connection of slate and stone.

Colour: a fashionable collection of pastels as well as a modern mix of colourful concrete varieties and a full spectre of bright warm colours liven up the environment. This is the heart of the collection and the one for which linoleum is most well-known: colour. Colours can be used as highlight or accent or combined in a unique mosaic floor to create an expressive environment.

Marble: classic and contemporary marbled colours that have been created to mix and match to give a special dimension to your floor plan. Use the natural marble of the linoleum by combining the different marble colour tones to create a rich and unique natural floor.

Besides combining within the themes, you can of course also combine each and every colour and design with each other.

GRIDS ONLINE

MARMOLEUM MODULAR OFFERS YOU AN ENDLESS CHOICE IN SHAPE, SIZE AND COLOUR TO CHOOSE FROM.

The collection lends itself to play with colours and patterns. We have created a number of grids as examples of the different floor types you can make. The grids can be coloured online and show you how your design transforms into real floors in real environments.

The Forbo floorviewer website offers you plenty of opportunities to play around, combine and create great looking floors.

COLOUR

t3242 - t3563 - t3887 (25 x 25 cm)

CREATING COLOURFUL, BOLD ENVIRONMENTS, HIGHLIGHTS, ACCENTS OR FLOORPLAN GUIDANCE

Colourful floors make bold statements, but they can also be a solid base for a designed space. The traditional two tone checkered floor becomes something very different when a third or a fourth colour is added, and if an element of randomness is added to the design, the floor looks spectacular.

Highlights and other combinations

The colour collection can also be combined with either Lines, Shade or Marble, where elements from the colour collection can create highlights or accents within a more plain floor plan.

MARBLE

PM-24 (t3048 - t3139 - t3407, 50 x 25 cm)

CLASSIC MARBLE IN MODERN TIMES

Experience our signature marbled linoleum in a new format. The collection of traditional and contemporary marbled designs combined with the choice of intense and colourful marbles complemented with simple and subtle marble designs give an amazing natural intense and realistic stone like effect. The traditional marble look comes to life in a modern fashion. The marbled floor designs combine particularly well with other natural materials like wood, stone, glass or leather, ideal for retail or hospitality environments.

CRAFTED BY NATURE - DESIGNED TO LAST

Making Marmoleum Modular is a co-creation with nature. We combine natural ingredients and process them with our expertise. The result of our passion is a beautiful, sustainable, PVC-free and durable

floorcovering which is natural and biodegradable. Forbo Marmoleum demonstrates the full product life cycle from which nature benefits.

A SUSTAINABLE CHOICE, READY FOR USE

Marmoleum Modular is unique in that each shape and form is cut separately from the base material. Well installed tiles have a seamless fit and don't need to be welded. The polyester backing makes the product very dimensionally stable, even when installed in larger areas. Modular Marmoleum is treated with Topshield2, a two layer acrylic water based finish, that avoids scratching, staining and soiling, and takes care of easy cleaning and excellent appearance retention of the floor over time.

Marmoleum Modular is a sustainable alternative to all designer modular floors available in the market today. With the new Topshield2 finish, once installed, the floor is immediately ready for use. The modular tiles are easy to install, require a minimal cleaning and maintenance regime and can be recycled after their useful life.

Please note!

- Linoleum by nature has a yellow tint which disappears when exposed to natural or artificial light.
- Linoleum is a natural product therefore colours may deviate especially for one colour in different dimensions.
- For a good result please install squares tessellated (quarter turned).

Marmoleum

Take a fascinating look into the world of colours and designs. Marmoleum was created to complement and enhance the architecture interiors of today's and tomorrow's buildings. Marmoleum is a natural floor, created from all natural ingredients. It is the most sustainable floor in the resilient flooring category. All Marmoleum floors include Topshield2, a double UV cured finish delivering floor performance in the real world, that result in the lowest cost of ownership over its life time.

The Unexpected Nature of Linoleum

This collection, based on modern design trends, is inspired by the natural phenomena around the world that make our planet special. Volcanic formations, tropical forests and lagoons as well as salt and ice formations have all inspired this collection of subtle, natural designs. Both the marbled and striped collections have unconventional colour combinations that are perfect for creating hugely inspiring floors that form serene environments with a natural touch.

Cork Linoleum

Forbo Marmoleum is created by combining linseed and rosin with wood flour and limestone. For Cork linoleum, the wood flour component is replaced by finely ground cork particles. Cork enhances the shock absorbent quality of floors and gives warmth under foot. This makes Cork linoleum the ideal surface for therapy rooms and rest areas in day care centres. Cork linoleum is available in a range of natural colours ranging from sand and ochre to stone red and a selection of subtle greys.

Marmoleum Sport

This 3.2 and 4.0mm Marmoleum is specially created for indoor multi-sports facilities. Sport offers a genuine environmentally friendly alternative to any PVC or Rubber sports floor offer. When installed on official sprung-wood subfloor constructions, it complies with the requirements of the international indoor sports associations for indentation, bounce and slip characteristics. For multi-sport environments or school gyms, Marmoleum Sport can be installed with a recycled rubber shock absorbent underlay. Markers lines and appropriate finish requirements can be applied easily.

Bulletin board

From the floor to the wall, Forbo Bulletin board is a linoleum surfacing material that's ideal for walls or vertical surfaces such as notice or pin-boards. It's also a functional aesthetic finish for walls, doors or cabinets. Bulletin board is also available in framed formats. Its bacteriostatic properties make it ideal for patient rooms and nurses' quarters.

Furniture Linoleum

Where Marmoleum is praised for its sustainable profile and functional performance, Furniture Linoleum is heralded for its aesthetic and tactile qualities. This finely ground, high-quality linoleum is a designer's dream when it comes to creating matte, smooth, hand-warm finishes to tabletops, cabinets and other furniture. The decorative surface can be easily cleaned, and, like leather, develops a beautiful natural patina over time. Forbo Furniture Linoleum is available in a range of 24 four solid, uni colours ranging from coal black to a warm white and the whole spectrum of colours in between.

Luxury Vinyl Tiles

Luxury Vinyl Tiles have matured into a new flooring category that is readily winning ground in all kinds of market segments. Whether it is retail, leisure, hospitality, offices or education and healthcare facilities, LVT is recognized as an easy to install, easy to maintain high performance floor covering that has the look and feel of its natural counterparts, be it wood, stone or any abstract material. Forbo's Allura LVT will last for years to come, with a unique design that has been created from the natural original to the refinement of the grain and texture that creates a lifelike copy, which in itself can claim to be an original.

Project Vinyl

Next to Luxury vinyl tiles Forbo offers a range of sheet vinyl flooring with specific technical features such as slip resistant flooring, conductive flooring, acoustic floor coverings and general purpose vinyl floors that come in a wide range of colours and designs. In some cases sheet flooring is chosen as alternative to LVT, at Forbo we have taken care that our collections are matching in colour and design to make combinations of various products possible within one installation.

Flotex floxed flooring

Flotex combines the practicality of a resilient flooring with the slip resistant and acoustic properties usually associated with textiles. Completely waterproof, Flotex is the only truly washable textile floor covering available today. The result is a warm, comfortable, hygienic floor covering that offers constant protection against bacteria and dust mites, and which is suitable for any commercial specification.

Textile flooring

Forbo's textile flooring collection is made up of high quality tufted tiles and a comprehensive range of needle-punched carpets. Our tufted carpet tiles offer the kind of flexibility in design and installation that the contemporary office demands, while our robust, hard-wearing needlefelt textiles are ideal for creating a tranquil and harmonious atmosphere in high-traffic situations.

Entrance flooring

Creating better environments starts at the entrance of any building. To avoid water, sand, mud and gravel being carried into the building a proper entrance floor is a good line of defense. Coral entrance floors are created to absorb moisture and scrape dirt of shoes and wheel that find their way into a building. Entrance floors can take care of lower cleaning and maintenance costs and give the floors inside the building their appearance retention.

TECHNICAL SPECIFICATIONS

Marmoleum Modular meets the requirements of EN-ISO 24011

	Total thickness	EN-ISO 24346	2.5 mm						
	Domestic: heavy	EN-ISO 10874	Class 23						
	Commercial: very heavy	EN-ISO 10874	Class 34						
	Light Industrial: heavy	EN-ISO 10874	Class 43						
	Dimensions (length x width)	EN-ISO 24342	25 x 25 cm	25x50 cm	50 x 25 cm	50 x 50 cm	75 x 50 cm	100 x 15 cm	100 x 25 cm
	Squareness and straightness	EN-ISO 24342	≤ 0.25 mm	≤ 0.35 mm	≤ 0.35 mm	≤ 0.35 mm	≤ 0.35 mm	≤ 0.35 mm	≤ 0.35 mm
	Indentation residual	EN-ISO 24343-1	≤ 0.15 mm						
	Castor chair continuous use	EN 425	Suitable for office chairs with castors
